

Metro Sign and Awning

INTERIOR SIGNS

Interior Signage Helps **DEFINE SPACE**

At Metro Sign and Awning, we've cultivated and strengthened our finely tuned sensitivity to space, and to the people who inhabit it. People often relegate Interior Signage to merely functional purposes. But your Interior Signage can function as a major element of your design statement, integrating text and graphics with pure space to redefine the look, feel, meaning and purpose of your built environment.

Learn how we do more than direct traffic throughout your building. Tap into a wide variety of materials, colors, shapes, sizes and styles to convey the unique advantages and benefits of your facility. Call us for details.

- Rolling Out Comprehensive Sign Programs
- Surveys

Custom Design or Fabrication From Your Ideas or Sketches

With vast experience on schools, universities, hotels, residential complexes, medical centers, assisted living facilities, and other projects ranging from 30 Haven and Blackstone (CWC) to Collins Elementary School (Gilbane), Dimock (Anniversary Sign), Golden Pond Assisted Living, Healthedge, Kenmore Abbey (CWC), Lord Jeffery Inn, Maxwell Green, North Reading High School, Northeastern University, Ocean House, Saltonstall Elementary School (Gilbane), Suffolk University, The Learning Center (CWC), Wampanoag (Dellbrook), and Waterside Place, we have the skills and seasoning to generate extraordinary outcomes despite complex issues of timing, budgeting, materials, colors and all the rest.

Everything we make is custom, so you can pick from a complete range of materials, styles, colors, and sizes. Just to name a few, you have the freedom to select Acrylic, Chemetal, wood products, magnetic and other inserts, glass, and Waterjet cutting, including Romark or raised lettering using any colors you desire.

THE OCEAN HOUSE

ADA Compliance

We have worked hard to earn our unmatched reputation with customers, large and small, many of whom come back to us for interior signage advice. One reason: our close relationship with the ADA Compliance Board and our detailed understanding of complex issues such as:

- Braille and Non-Braille Lettering Requirements
- Suitable Identification of Stairwells
- Proper Heights and Dimensions of Room Identity Signage
- Specific Signage Requirements For Egress, Elevators, and Fire Evacuation Routes
- Clear Labeling of Doorways

In addition, our familiarity with the latest Local, State, and National Standards, and our demonstrated ability to gain approvals from Fire Departments where you do business means you'll avoid costly delays and earn your project's Certificate of Occupancy as early as possible.

Flexibility, Creativity, Mastery, and Quality

The best interior signage works in close harmony with other elements of the built environment. We routinely accomplish this by adroitly marrying creativity, flexibility, technical mastery, and a deep understanding of your audience, while delivering the highest quality. We are expert at synthesizing extremely satisfactory results from a project's requirements and opportunities for design, branding, architectural fluidity, look and feel, regulatory requirements, and other considerations, creating a comprehensive, integrated interior signage system.

With our network of talented sign specialists, we can meet your job's requirements for Open Shop, Prevailing Wage, or Union Install capabilities.
